Hi Helen,

Just thought we would let you know how pleased we are with Bio-Blu .

Since we bought our spa 6 years ago, we have tried various products to keep the water healthy. We tired very early on of chlorine; the smell, the taste and the feel of the water were just not conducive to a relaxing spa experience.

We then tried several different types of silver ionising products, with varying success; they were certainly better than chlorine but still didn't quite come up to scratch and were rather costly into the bargain.

Bio-Blue sounded perfect when we discovered it but we were sceptical of its claims, it seemed too good to be true but we decided to purchase some & try it out. It is now well over 12 months since that tryout and we are hooked.

All the family use the spa when visiting, the youngest so far is our 2 month old great-granddaughter & we didn't hesitate to take her in, the water is so gentle on her delicate skin & she loved it.

The product does all it promises to and is very economical into the bargain, what more can you ask for? Add to that your terrific service, advice when needed and prompt delivery and it looks like we will be using Bio-Blu for as long as we have a spa!

Cheers,

Diane & Colin
